

FIELD LABORERS

A Field Laborer is an unskilled to semi-skilled worker who clears and prepares sites for construction projects and the installation of water, storm and sewer lines.

Responsibilities

- Dig ditches or trenches, backfill excavations, and compact and level earth to grade specifications using picks, shovels, pneumatic tampers, and rakes.
- Signal equipment operators to facilitate alignment, movement, and adjustment of machinery, equipment, and materials.
- Clean and prepare construction sites to eliminate possible hazards.

Essential Skills

- Ability to perform strenuous manual labor as the job requires frequent walking, bending, stooping, squatting, lifting, moving, and carrying equipment, tools and materials weighing up to 100 pounds.
